EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Larry E. Henneman, Jr. on 11/17/03.

The application has been amended as follows:

Claim 19 has been re-written as follows:

--19. A mounting device for accepting an imaging device, comprising:

a frame having a recess formed in a rear surface of the frame for accepting the imaging device;

at least one stress relief recess formed in a front surface of the frame, said stress relief recess not passing entirely through the frame; and

at least one screw hole through the frame.—

The title has been changed as follows:

-- Liquid Crystal display mount including a frame having stress relief recess--

Allowable Subject Matter

2. Claims 1-23 are allowed.

3. The following is an examiner's statement of reasons for allowance:

4. As to claim 1, the prior arts of record do not anticipate or render obvious to one skilled in the art a display device comprising various elements as claimed, more specifically a stress relief recess being disposed between a corner and the midpoint of an edge adjacent the corner of the mounting border.

5. As to claim 12, the prior arts of record do not anticipate or render obvious to one skilled in the art a mounting frame for mounting an imager subassembly comprising various elements as claimed, more specifically the stress relief recess being disposed at a distance not greater than one-fourth of the width of the main body from the mounting hole.

6. As to claim 19, the prior arts of record do not anticipate or render obvious to one skilled in the art a mounting device for accepting an imaging device comprising various elements as claimed, more specifically at least one stress relief recess being formed on a surface of the frame and not passing entirely through the frame.

7. The closest reference, USPAT 5,868,485 (Fujimori) discloses a display device assembly that includes a frame for accepting an imaging device and wherein the frame includes an engagement groove. However, Fujimori fails to teach or suggest that the engagement groove is being used as a stress relief recess for the imaging device.

Further, Fujimori also fails to teach or suggest that the engagement grooves are located between a corner and the midpoint of an edge adjacent the corner of the frame or that

Art Unit: 2871

engagement grooves are disposed at a distance not greater than one-fourth of the width of the main body from the mounting hole or that the engagement grooves not pass entirely through the frame. Further, the instant claims as amended obviate the double patenting rejection over claims 1-19 of USPAT 6,307,603.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
